# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

## 1. Guide Purpose and Usage

### Guide Purpose

- To continue from the Membership, Subscriptions and Products Introductory guide
- To help Silverbear clients familiarise themselves with the more detailed functionality around product sales and membership and subscription management

### Included

- Product sales in the Cart
- Membership regrades and cancellations
- The Bulk Renewal Tool
- PM Refresher Service
- Lapsed memberships

Please note that the screens and layouts on your Silverbear environment are dependent on your organisation's unique configuration and business requirements, and each individual's access and security settings. Therefore, some of the screenshots and menu options you see will not exactly match up with those on your own screens

PREREQUISITE GUIDES/COURSES	RECOMMENDED PRIOR GUIDES/COURSE	RECOMMENDED FOLLOW UP COURSE(S)
Fundamentals – Introductory Module  Contacts and Organisations – Introductory Module  Memberships, Subscriptions and Products - Introductory Module	Finance – Introductory Module	Memberships, Subscriptions and Products: Advanced Module  Finance – Advanced Module

### TRAINING TASKS

You should have been advised which environment (e.g. UAT) you should use for your practice tasks. If you are unsure, please ask your internal CRM administration team who will contact Silverbear if necessary.

### FEEDBACK

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 1. Guide Purpose and Usage

If you have any feedback on any of the instructions or screen shots please email [susannah.patrick@silverbear.com](mailto:susannah.patrick@silverbear.com)

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 2. Cart Sales – (processing purchases through the CRM)

- Sales can be made to Contacts or Organisations (accounts). Throughout this guide we will use a Contact record card as a starting point but please assume that an organisation record card could be used instead for sales to businesses
- Sales to contacts made through the CRM (rather than via the portal) take place through the *Cart*. Once you have found your Contact (or Organisation) and can view their record card, choose the *Cart* tab. If you cannot see a *Cart* tab, press Related (...) and then select *Cart*. Please make sure your contact has at least one address on their record as an invoice address is needed in the *Cart*
- Basic *Cart* sales were covered in the Introductory Module. The following sections describe further *Cart* functions

#### 2.1. Invoicing and Shipping information

- In the *Cart* you can choose up to three different addresses; *Invoicee Address*, *Customer (shipping) Address* (accessed by using the drop down and choosing addresses already stored on the record card for that contact) and an alternative shipping address. Clicking on the *Alternative Shipping Address* check box gives you a chance to enter a brand-new address (useful if this is a gift purchase)
- A *Purchase Order No.* can be entered if required by your customer
- You can customise the invoice further by using the *Invoice Description* box which allows you to enter any specific text to appear on this individual invoice

For this sale, *Use Alternative Shipping Address* was selected, and a new delivery address entered.

The *Payment Date* will default to the day you access the cart, but can be changed

*Purchase Order* (above) and *Invoice Description* are both free text fields that allow you to personalise the printed/emailed invoice for your customer

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

- If a different organisation or individual is paying for the purchase you can choose an alternative Invoicee. On the right-hand side of the Cart in the Billing information, press the magnifying glass next to the *Invoicee* field to bring up a search window

Press to search for a different contact or organisation to receive an invoice for this purchase.

When the search box appears, change from Contact to Organisation if appropriate and enter part or all the name in the search box. Press the Search button

Press Select. When this transaction is completed, the invoice will be recorded under the Invoicee's record; however, the membership (or other product) will be attached to the original customer

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

- If you are selling a renewable membership or subscription and have used an alternative invoicee, but you would like the member to receive the renewal invoice, tick the *Renew Using Customer* check box in the customer/shipping information. In the example below, Silverbear will receive the invoice for the initial membership, but the Contact Susannah Patrick, who will become a member, will be invoiced when

Tick *Renew Using Customer* if you have an alternative Invoicee for the initial membership but the new member will be paying renewal invoices

The screenshot shows the Dynamics 365 CRM interface for a contact named Susannah Patrick. The 'CUSTOMER / SHIPPING INFORMATION' section is expanded, showing the 'Renew Using Customer' checkbox checked. The 'BILLING INFORMATION' section shows the 'Invoicee Name' as 'Silverbear' and the 'Invoicee Address' as '1 Faraday Road, Guildford, Surrey, GU1 3BA, United Kingdom'.

### 2.2. Factors affecting product options in the Cart

Some choices which you make in the *Customer* and *Transaction* sections will affect which products are available to select in the Cart section at the bottom of the screen.

- If you have more than one *Business Organisation* (if perhaps your CRM has been set up to manage sub organisations within your business), please make sure you have chosen the correct *Business Organisation* that sells the particular product your client is purchasing
- If your contact does not have an address, or has an address without a *Country* field completed you would normally see an error on the cart
- *Currency*. If you choose a currency which is not supported by your product (your product is not attached to a price list for that currency) then the product will not appear when you search for it. The currency stored on the contact record will transfer to the cart by default but can be changed
- The *Payment Type* chosen may also restrict your product choices as you may have some products which are only available through specified methods of payments. Make sure that the *Payment Type* you are choosing is valid for the product your customer is buying. Please note that you cannot mix and match payment types either in the Cart or on the portal; each transaction can be made through one payment type only. A second transaction would need to be processed if you have different products with different payment types

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

The Currency can affect which products are available for sale in the Cart

If you have more than one Business Organisation, ensure you have chosen the

Ensure that the Payment Type you choose is applicable for your product choice; it is possible to restrict payment types for different products

The screenshot shows the Dynamics 365 'Sandbox' environment with a 'Transaction Details' form. The form includes fields for Payment Date, Currency, Business Organization, and Payment Type. Three orange callout boxes provide instructions: one points to the Currency field, another to the Business Organization dropdown, and a third to the Payment Type dropdown.

## 2.3. Payment Options in the Cart

- By default, there are four different payment types available to use in the Cart. Only one payment type can be used per transaction so if, for example, you have a customer who is buying a membership by Direct Debit and some products which can only be paid for on card, then you would need to carry out two separate Cart transactions
- The **Credit Card** option refers to offline payments taken using a pdq machine in your organisation. Using this option will trigger the credit card reference field but will not trigger your online payment gateway
- **Direct Debit** – If you have a Direct Debit instruction for your customer you will be able to process a Direct Debit transaction (which will create the necessary contracts and DD payments) if the product you are purchasing allows Direct Debit as a method of payment. For more information on creating Direct Debits please refer to the Finance module
- **Invoice** – if this is selected, you are requesting your client pay later after receiving an invoice. Further action will need to be taken later to process the payment when it is received
- **Online payment** – choosing this will launch your online credit card payment portal when you checkout the transaction

This is a close-up view of the 'Transaction Details' form. It shows the 'Payment Type' dropdown menu open, with options for 'Credit Card', 'Direct Debit', and 'Invoice'. The 'Credit Card' option is currently selected. Other visible fields include 'Payment Date', 'Currency', 'Business Organization', and 'Invoice Sub Type'.

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 2.4. Instalment Options

- Direct Debit purchases can have instalment options (if this is an option your organisation offers)
- Annual (a single payment) is chosen by default, or you can choose monthly or quarterly. Monthly instalment values must be set up at the product setup level for this functionality to work – please see the Advanced Module for product setup information
- If you choose monthly or quarterly instalments, please note that the monthly instalment value will be shown in the *Unit Price* field in the Cart section. However, after checking out the correct quarterly value will be shown on the invoice
- If you have a fixed term membership and there are only a few months left for it to run and you wish to choose quarterly or monthly instalments you may need to adjust the number of instalments to reflect this so that a membership is not been paid for after it ends. An error will appear if there is a conflict between the number of months remaining and the instalment value on a monthly instalment plan. Please note that this warning does not appear on a quarterly instalment; the number of instalments will be changed automatically when you check out

- The overall price of a membership paid for by monthly or quarterly instalments may be different to the annual price, as the monthly instalment price is set up separately rather than being calculated by the Cart. If there is no monthly price set up and you choose one of these instalment methods, then the price will show as £0
- To select instalments, choose an applicable *Payment Type* and tick the *Use Instalments* check box
- Change the *Instalment Plan* to **Monthly** or **Quarterly**
- If necessary, change the number of *Instalments*

TRANSACTION DETAILS	
Payment Date	<input type="text" value="11/09/2020"/>
Purchase Order No.	<input type="text"/>
Payment Type	<input type="text" value="Invoice"/>
Use Instalments	<input checked="" type="checkbox"/>
Instalment Plan	<input type="text" value="Monthly"/>
Monthly Ongoing	<input type="checkbox"/>
Instalments	<input type="text" value="12"/>

- After selecting the product check that the *Gross Price* is correct before completing the transaction

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 2.5. Selecting and editing your product(s)

- To select the products, scroll down to the CART section at the bottom of the screen and type in the name or part of the name of the goods or services you are selling (e.g. typing Mem will find products with the word Membership in them)
- If you are unable to see your product, please refer to the section “Factors affecting product options in the Cart” above
- Ticking *Show products from all payment types* will enable you to view any products even if they are not payable by your selected *Payment Type*, but you will receive a message as below if you select them. This can be helpful a helpful step however if you are trying to work out why a particular product is not showing

- If your product is not shown (and your business practices allow it), ticking “enable write in Product” will allow you to manually enter the details of the product being sold. This should not be used for memberships or subscriptions as no additional

Type in part or all a product name (e.g., a membership type) and then click to select. More than one product can be sold at

Product	Start Date	End Date	Unit Price	Use For Rate Price	Unit Amt	Qty	Max Qty	Discount	Discount	Tax	Unit Price	Price	Quantity	Destination	EDIT	DELETE

Enable Write in Product

CART SUMMARY Total Basket Tot: £179.99

### 2.6. Editing your basket

- Press the Edit button at the end of the line to change certain aspects of the transaction.
- You can only change a single line at once.

Product	Start Date	End Date	Unit Price	Use For Rate Price	Unit Amt	Qty	Max Qty	Discount	Discount	Tax	Unit Price	Price	Quantity	Destination	EDIT	DELETE
Silverbear Book	21/06/2020	24/06/2021	1.0000	<input type="checkbox"/>		1				0.0000	1.0000	1.0000			<input type="checkbox"/>	<input type="checkbox"/>
Silverbear Book			1.0000	<input type="checkbox"/>		1				0.0000	1.0000	1.0000			<input type="checkbox"/>	<input type="checkbox"/>

Enable Write in Product

CART SUMMARY Total Basket Tot: £179.99

Clicking *Edit* allows you to change some of the details

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

Press *Update* to apply any the changes

You can override the *Price*, *Quantity* and *Tax Code*

Any *Discounts* which are available for use with this product will be accessible from the drop-down box (the discounts will first need to be created and enabled for this product in the product setup screens)

## 2.7. Membership and Subscription Cart options

- Membership and Subscriptions run for a specified period, either a number of months or for a fixed term period (e.g., January to December), this is defined in the product setup but it is possible to change the start date and end date of the membership or subscription in the cart
- If a membership is running on a fixed term basis e.g., January to December, but the purchase is being made part way through the year your organisation may offer a discounted price to reflect the price for the actual months of membership. If that is the case, the *Pro Rata* box should be ticked. If the full price of the membership is due regardless of when in the year it is bought it should be left unchecked
- If monthly or quarterly instalments are chosen, the Unit Price will reflect the instalment price, and this will be multiplied by the number of instalments to give the Gross Price. In the example below the membership runs from January to December but is being purchased part way through the year with only 5 months remaining, *Pro Rata* is ticked so the price is updated to reflect 5 months' worth of instalments

Use *Pro Rata* price will reduce the cost of the membership to reflect the number of months left on it (applicable if your membership period is fixed rather than a number of months from purchase)

In this case the customer is paying by Monthly Direct Debit and so the unit price reflects the cost of monthly instalments. The *Gross Price* is that value multiplied by the number of

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 2.8. Reporting and tracking

- In the *Transaction Details* section of the Cart screen, you can choose a *Campaign* to attach to this purchase (if a Campaign has been created in your CRM). This will allow you to track the results of your marketing activities (e.g., a campaign to attract new members)
- If you have created a unique discount code for a promotion or offer, then selecting that in the Cart section at the bottom of the screen will allow you to monitor the discount usage
- The *Destination* field on the Cart can be changed if you want to specify financial coding for this transaction (the default destination code for the product(s) will be automatically selected)

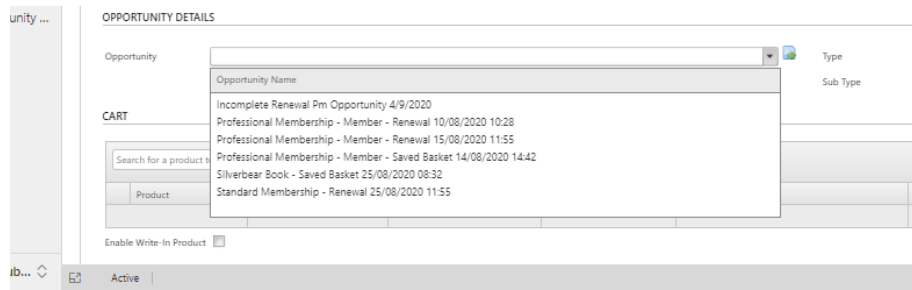

### 2.9. Checkout functions

- Your Payment type will determine what happens when you press *Checkout*. If you have selected **Invoice** then *Checkout* will complete the transaction and email an invoice to the customer (assuming your Silverbear CRM has been configured to do so), leaving a payment in a pending state ready for money to be taken at a later date (please see the Finance modules for details on how to clear invoices)
- If you chose **Direct Debit** a DD Contract will be created (and in a typical configuration it would be emailed), plus other Direct Debit functionality will take place
- If **Credit Card** has been selected a *Credit Card Reference* will need to be entered – an online payment gateway will not be triggered as this method refers to credit card payments taken on a pdq machine. The transaction will complete and show as fully paid and in a typical configuration a confirmation/receipt would be emailed
- If **Online Payment** is selected, then the Payment Gateway screen with invoicing and payment details will be displayed. Press *Proceed* to launch your online Payment provider portal and enter the credit card details. Once that is completed, the transaction will be finalised, and the payment shown as received and any pre-set confirmation emails will be sent from your CRM

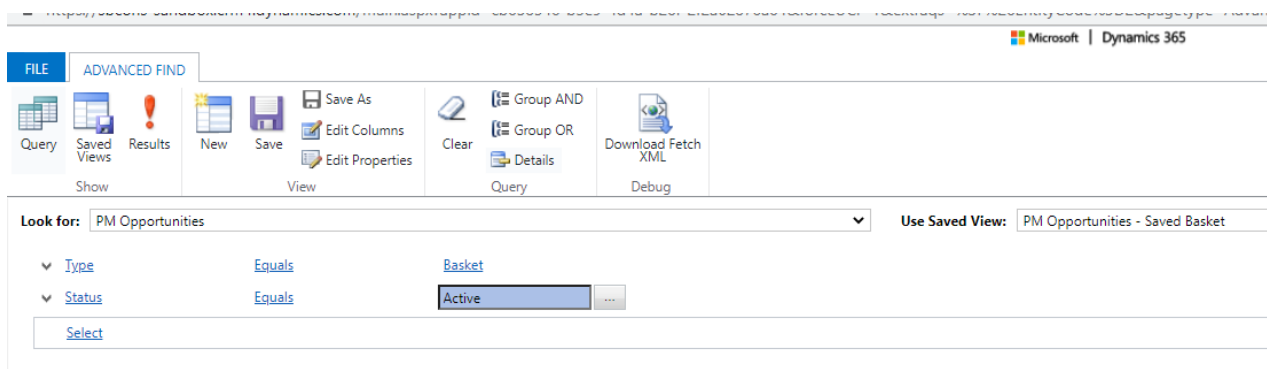

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

## 2.10. Saving and retrieving a basket

- If your customer is not ready to complete the transaction at this stage, you can *Save* the basket
- To retrieve a saved basket, open the Cart for your contact or organisation and scroll down to the *Opportunity* section
- Clicking the drop-down arrow at the end of the *Opportunity* field will bring up any saved baskets as well as renewal pm opportunities (these are covered later in this module). Choose the relevant basket and then press the green arrow to “load” the details back into the Cart

- Alternatively, from the *Contact* record card, press *Related* and then *PM Opportunities* to see all PM opportunity renewals and saved baskets. Choose the relevant basket and select *Related* and *Cart*. You can then checkout or edit/add to the basket
- If you are tracking incomplete baskets for sales monitoring/development purchases, you may want to create an advanced find like the one below which will display any incomplete sales

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

## 2.11. Viewing and changing add-on products (e.g., for multiple memberships)

If the product you are selling has additional items attached – for example if it is a Corporate Membership which is packaged together with individual memberships, those will only appear after clicking on the *Edit* button in the Cart section. This allows you to see the additional item(s) and if necessary, make changes to the *Quantity*. Press *Update* after making any changes. Further information on administrating these types of memberships is covered in the Advanced Module

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 3. Membership Management

The Silverbear system (in a typical configuration) will allow you to manually regrade (change the membership type), cancel or renew single memberships. Individual renewals were covered in the Introductory Module of this course. Bulk renewals are carried out through a separate mechanism and this is covered later in the chapter. The next sections cover regrading and cancellations

#### 3.1. Regrading - introduction

The term regrade refers to the changing of one membership type to another. This can be done part way through a membership, or at the point of renewal. For example, if a client's membership runs from 1<sup>st</sup> May to end of April and they contact you in October to change their membership to a premium level, there may be two options for that client

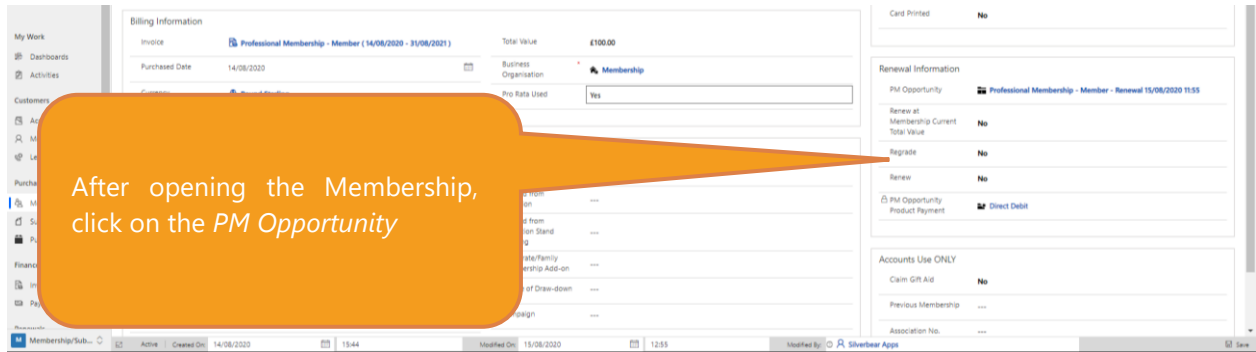

- Regrade now. Change the membership level immediately. The membership will continue to the previous renewal date (e.g. the end of April) but at the new membership level or type, and then will renew at this new membership type
- Regrade at the time of renewal. The membership will remain at its current level/type until the standard renewal time in April. At that point their membership (if renewed) will switch to the new membership type

If your customer wishes to end their existing membership completely and take out a new twelve-month membership, then cancelling the current one and selling a new membership may be more appropriate. Please see the cancellation section

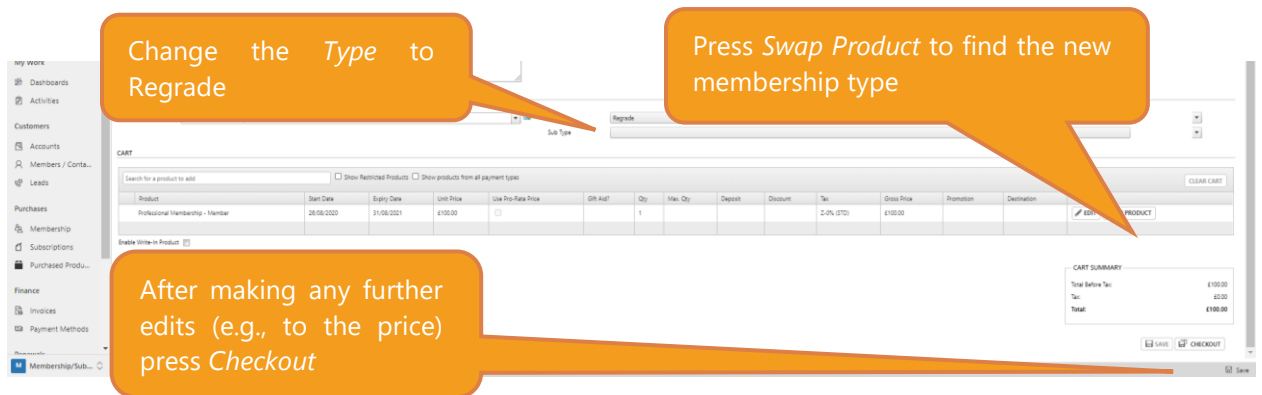

#### 3.2. Regrade immediately

- The first step is to access the PM Opportunity for the membership which is being regraded. *PM Opportunities* (as mentioned in the Introductory Guide) are records in which are held details of the product a customer will have if they renew their current membership or subscription. This record can be used to process the renewal, or in this case a regrade
- PM opportunities can be accessed in a couple of different ways. One option is to find the membership that the contact wishes to change. If you have a membership tab on your contact (or organisation) record card use that as your starting point. If you do not have a Membership tab, click *Related* and then *Memberships*. Find the membership and click on it
- Go to the section labelled *Renewal Information* and click the blue hyperlink which appears in the *PM Opportunity* field

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

- You will now be in the *PM Opportunity* record. Do not make changes directly in this record; instead click on *Related* and then *Cart*.
- The Cart will now be loaded with the PM Opportunity details shown.
- The alternative method to that explained above is to access the Contact or Organisation that is renewing, click *Related* and then *PM Opportunities* and select the correct *PM Opportunity* if there is more than one
- Once in the cart, you can also change the Payment Type, if the customer is paying for their new membership by a different method.
- Scroll down to the *Opportunity Details* section and change the *Type* to *Regrade*
- Press the *SWAP PRODUCT* button on the line of the membership and search for the new membership type
- You may need to change the price (see implications and considerations below)
- Once you have finished editing, press *Checkout*.

- It may be helpful to check the membership information for your contact; they should have an inactive membership (the original membership type) with a

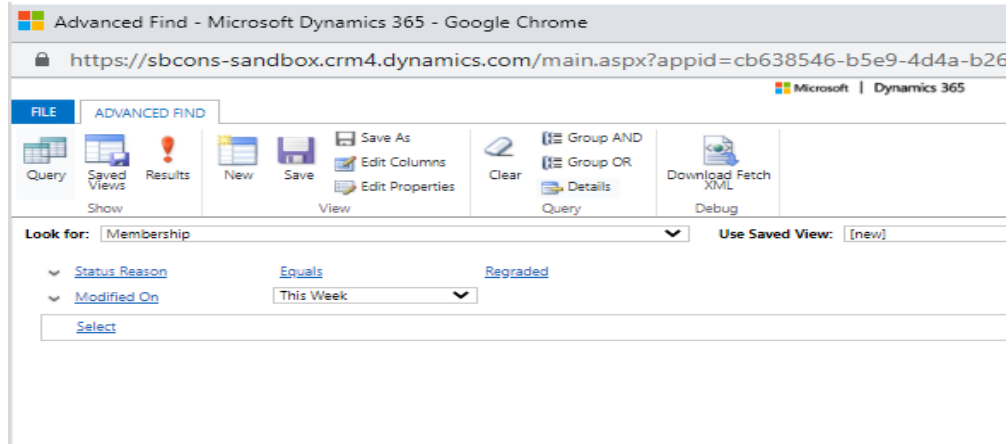

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

*Status Reason* of Regraded and a new active membership of the new membership type

### 3.3. Finance and membership implications and considerations of renewals

- When regrading the cart will apply the original membership dates to the new product. If your original membership for your customer ran from 1<sup>st</sup> July to 30<sup>th</sup> June then regrading to a different membership type will keep those original dates, even if that new product normally has a different membership period. If you want to change the dates you would need to do that in the Cart section.
- The standard price of the new membership type will be applied. If you are discounting or making it free of charge because the customer has already paid for a membership, you would need to adjust the price manually using the *Edit* function.
- If the client is moving from a more expensive membership to a cheaper one and you need to create a refund you would need to create a credit note for the original invoice and refund. Credit notes and refunds are covered in the Finance Modules
- If your customer has an outstanding invoice for the original product which has not been paid this could be cancelled or written off, or have a credit note applied, whichever is appropriate for your business practices. please see the finance guides
- If your customer was paying by direct debit, the original direct debit contract will need to be cancelled – please see the finance guides
- There may be other implications/processes – please check your internal practices for any additional tasks required
- You may find it helpful to have a saved view (perhaps on a dashboard) allowing you to monitor regrades to ensure that relevant finance functions take place. The advanced find below searches for any regrades on memberships, with a modified date of this week

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

## 3.4. Regrade at renewal

- In this scenario, your customer has contacted you to ask to change their membership type when they renew. Their existing membership will run until their normal renewal date
- Open the *PM Opportunity* as described in the process above, go to the section labelled *Renewal Information* and click the blue hyperlink which appears in the *PM Opportunity* field
- You will now be in the *PM Opportunity* record. Do not make changes directly in this record; instead click on *Related* and then *Cart*.
- The Cart will now be loaded with the *PM Opportunity* details shown.
- For regrades at renewal, leave the *Type* as *Renewal*
- Press the *SWAP PRODUCT* button on the line of the membership and search for the new membership type
- Press *SAVE* (not checkout)

Leave the *Type* as *Renewal*

Press *Swap Product* to find the new membership type

Press *Save* (do not checkout)

Product	Start Date	End Date	Unit Price	Use Pro-Rate Price	QTY	Qty	Min. Qty	Deposit	Discount	Tax	Gross Price	Itemization	Destination
Professional Membership - Member	25/06/2021	24/06/2022	£10.00		1					2-0% (ST)	£120.00		

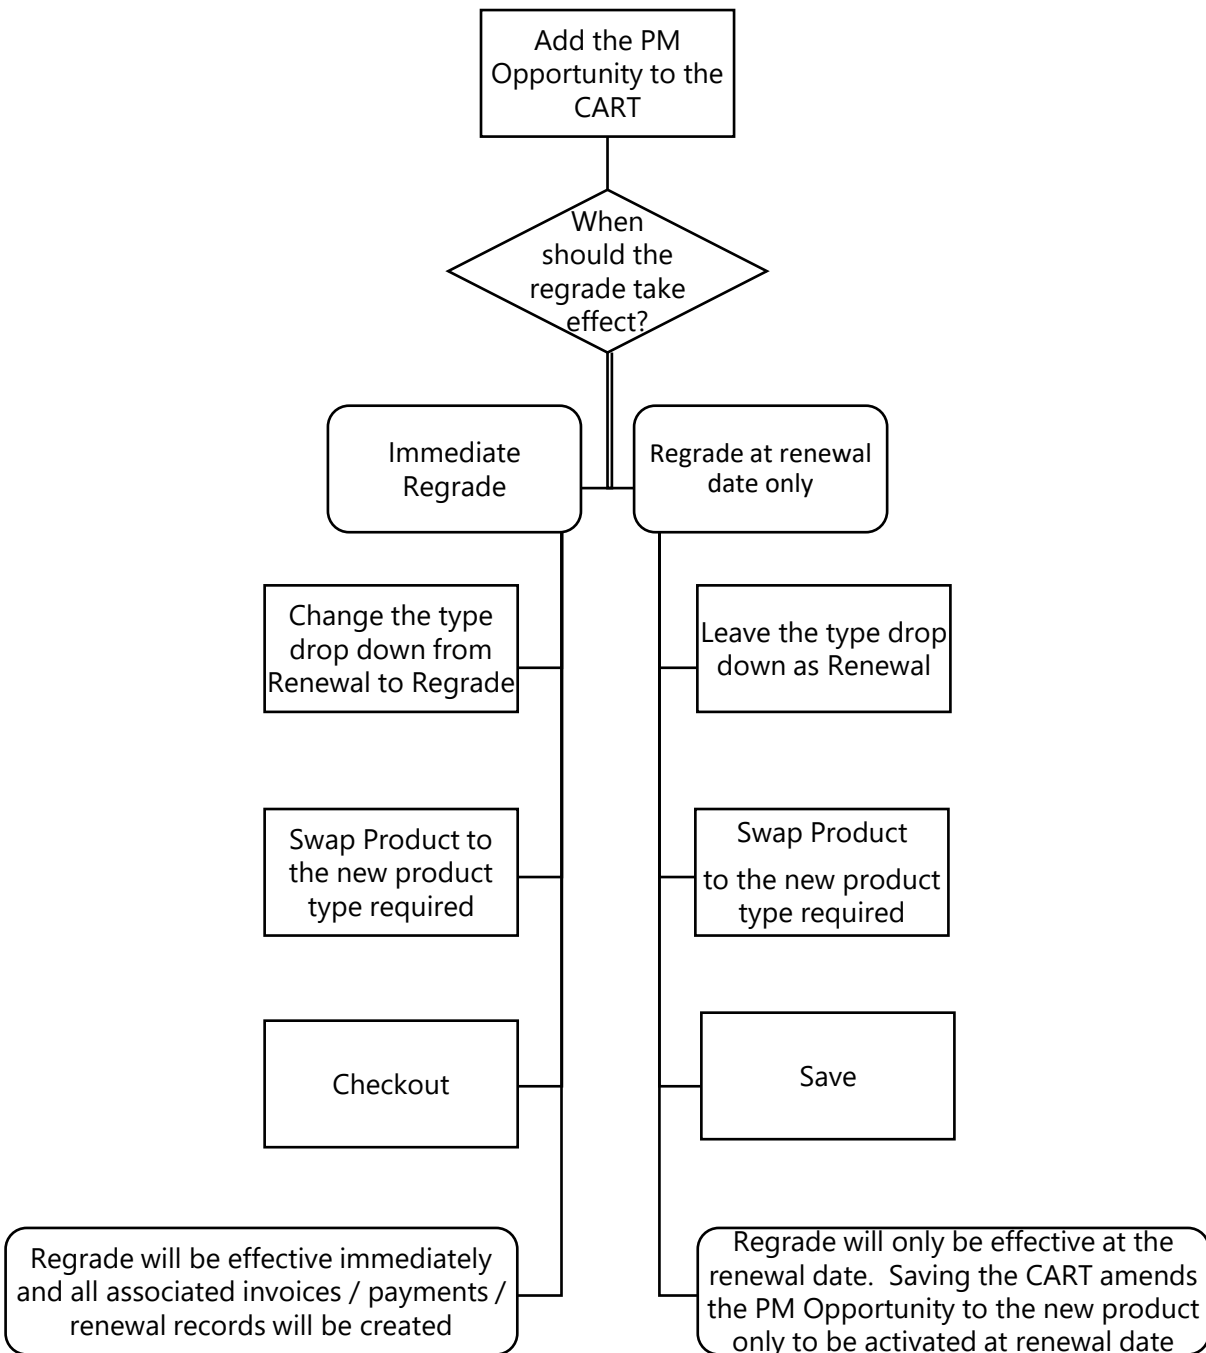

CART SUMMARY

Total Before Tax:	£120.00
Tax:	£0.00
Total:	£120.00

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

- This will update the PM Opportunity for the membership. It may be helpful to check the Membership information for your contact, their Membership should remain as active, however the PM Opportunity as shown in the Renewal Information section should now reflect the membership type you swapped to

### 3.5. Regrading process summary

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

## 3.6. Membership cancellations

Rather than change to a different membership level, your clients may want to cancel a membership. They may request this is done immediately or ask for their membership not to be renewed.

## 3.7. Immediate cancellation

- Find the Contact (or Organisation) and access their membership information by clicking on the *Membership* tab if there is one or choosing *Related* and then *Memberships*.
- Open the relevant membership record
- Go to the *Status/Cancellation* section and select an appropriate *Cancellation Reason* from the drop-down list of options
- There is a second, optional *Cancellation Reason* box in which you can type free text
- We recommend you change the *Expiry date* to the date of cancellation
- Press the *Deactivate* button on the *Command Bar*

The screenshot displays the Dynamics 365 interface for an Employee Membership record. The record is titled 'Employee Membership' and shows various details including Membership No. (MEM-000000217), Expiry Date (03/09/2021), and Status (Active). The interface is annotated with two orange callout boxes:

1. Choose a *Cancellation Reason* (pointing to the Cancellation Reason dropdown menu in the Status / Cancellation section).
2. Press Deactivate (pointing to the Deactivate button in the Command Bar).

The Status / Cancellation section shows the following options:

Status Reason	Active
Cancellation Reason	No Benefit from Membership
Cancellation Reason	Not currently able to use benefits of membership

The Billing Information section shows:

Invoice	Total Value	£0.00
Purchased Date	Business Organisation	Membership
Currency	Pro Rata Used	No

The Renewal Information section shows:

PM Opportunity	...
Renew at Membership Current Total Value	No
Regrade	No
Renew	No
PM Opportunity Product Payment	...

The Accounts Use ONLY section shows:

Claim Gift Aid	No
Previous Membership	...
Association No.	...

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

- A confirmation box appears, at this stage change the *Status* to **Cancelled** and then press *Deactivate*

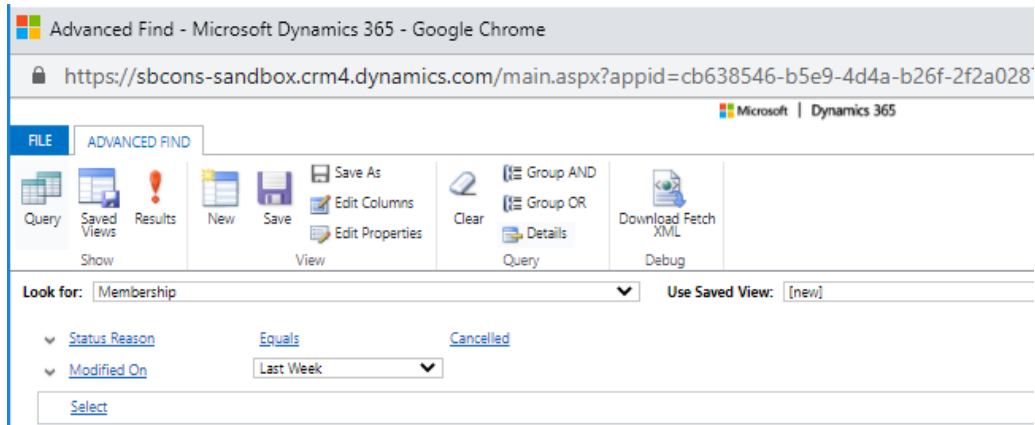

- You can then check the process by viewing the Contact/Organisation's membership again; the membership should now be showing as inactive with a *Status Reason of Cancelled*

### 3.8. Implications and considerations of immediate cancellations

- If your customer has an outstanding invoice for the original product which has not been paid this may need to be cancelled, written off, or have a credit note applied, whichever is appropriate for your business practices. Please see the Finance Modules for help on these functions
- If your customer was paying by direct debit, the original direct debit contract will need to be cancelled – please see the Finance Modules
- If your customer has already paid for their membership your business practice may be to create a credit note and a refund. Please see the Finance guides
- Your organisation may have automated communications which are sent to confirm a cancellation, or you may need to confirm manually (e.g. by sending an email). Please check the activities section of your Contact or Organisation's record card for any automated emails which may have been sent if you need to verify this
- There may be other implications/processes – please check your internal practices for any additional tasks required
- You may find it helpful to create an *Advanced Find* and then use this to make a view showing any recent cancellations to ensure that the relevant team or team member carries out any finance functions. An example of an advanced find for cancellations is shown below. The criteria for this search are any memberships which have been cancelled with a *modified-on* date of last week.

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 3.9. Cancelling at renewal

In this scenario, your client has asked for their membership not to be renewed; on the expiry date of their current membership the membership will end completely

- Find the Contact (or Organisation) and access their membership information by clicking on the *Membership* tab if there is one or choosing *Related* and then *Memberships*.
- Open the relevant *Membership* record
- Go to the *Status/Cancellation* section and select an appropriate *Cancellation Reason* from the drop-down list of options
- There is a second, optional *Cancellation Reason* box in which you can type free text
- Change the *Deactivate on Expiry* field to Yes.
- Press *Save & Close* – do not deactivate the membership
- When the membership/subscription reaches the expiry date it will be automatically cancelled, and no renewal will take place

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

The screenshot shows the Dynamics 365 interface for a 'Professional Membership - Member' record. The record is active, with a membership number of MEM-0000000072 and an expiry date of 31/08/2021. The 'Status / Cancellation' section shows the status as 'Active' and the cancellation reason as 'Fully Retired'. The 'Deactivate on Expiry Date' checkbox is checked (Yes). The 'Card Printed' checkbox is unchecked (No). The 'Renewal Information' section shows the membership is not renewed at the current total value, and the 'Renew' checkbox is unchecked (No). The 'Accounts Use ONLY' section shows 'Claim Gift Aid' is unchecked (No). The 'Previous Membership' and 'Association No.' fields are empty. The 'Billing' section shows an invoice for 10/08/2020 for the amount of Pound Sterling. The 'Subscriptions' section shows a list of subscriptions, including 'Derived from Donation', 'Derived from Exhibition Stand Booking', 'Corporate/Family Membership Add-on', 'Source of Draw-down', and 'Campaign'. The 'General' section shows the membership name as 'Professional Membership - Member', the contact as 'Caleste Stevens', and the start date as 10/08/2020. The 'Save' button is highlighted with an orange callout box containing the text 'Press save and close'. The 'Cancellation Reason' dropdown menu is open, showing 'Fully Retired' as the selected option, with an orange callout box containing the text 'Choose a Cancellation Reason'. The 'Deactivate on Expiry Date' checkbox is highlighted with an orange callout box containing the text 'Change Deactivate on Expiry to Yes'. The 'Save' button is also highlighted with an orange callout box containing the text 'Press save and close'.

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 4. Renewals

- If a membership is renewed on or before its expiry date, then after the expiry date that membership will be inactive, and a new membership will begin
- A membership is renewed if the Bulk Renewal Tool (described further in this section) or the individual renewal process takes place. When the renewal occurs, the new membership record is updated and an invoice is created for your customer (and in most cases, depending on your configuration, it will be emailed to your customer for them to pay via a number of methods including your portal or by contacting your membership team)
- The term **renewed** does not indicate that the membership has been paid for. A Membership can have been renewed, and the new membership now active, while you are awaiting payment
- Some organisations put the emphasis on the client to renew their membership and therefore memberships are renewed on an individual basis. The Introductory Module covers individually renewals
- If a membership is not renewed it will eventually lapse (there are different options around lapsing, please see below)
- Some organisations however prefer to automatically renew all memberships (or all of certain types of memberships); usually in advance of their expiry date, giving their members the opportunity to pay their new invoices, or cancel their renewed membership if they do not want to keep it.
- In this case, if those members do not pay their membership fees within a certain amount of time, further steps would need to be taken by those organisations to review and if necessary, change the status of those memberships, as they will be renewed and active. This is not an automated process unless it has been specifically requested as part of your Silverbear configuration
- The Direct Debit schedule will correspond with the dates of the renewed membership. For example, if a membership is due to expire on 31<sup>st</sup> August, but is renewed in early July, then the Direct Debit payments will not start until the new membership starts.
- If a membership is not renewed and does not have *Deactivate at Renewal* ticked (as we carried out in the section above) then the membership will remain active until a lapsing process takes place which will change the status of any non-renewed memberships. This is covered further in this section

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 4.1. Accessing the Bulk renewal tool

The Bulk Renewal Tool is a separate application that will be stored on your own computer(s) or be available on a remote desktop. It is not currently on the Cloud and is not accessed through Silverbear CRM. Your Systems Administrator or Silverbear should be able to help you access the Bulk Renewal Tool. The shortcut is the icon below

### 4.2. Scheduling the use of the Bulk Renewal Tool

- The tool should be run whenever you want to renew a set of memberships in bulk. Many organisations carry this out once a month for memberships due to expire in the near future (e.g. the following month, or the month after)
- The Bulk Renewal process can take some time to process the updates, depending on the number of memberships and subscriptions you are renewing. For large batches, this process is best carried out overnight or during close of business. The PM Opportunity update process is suspended whilst a Bulk Renewal is processing.

### 4.3. Running a bulk renewal

- Open the tool and connect to your CRM
- Select the *Month* and *Year* for renewals. Any memberships which expire in the month you have chosen can then be retrieved and renewed
- Select the *Product Type* – *Membership* or *Subscription* or Both (All)
- Select the *Payment Type* – for example you can choose all memberships/subscriptions payable by **Direct Debit** or all payable by **Credit Card**. To retrieve all records for that month regardless of payment type choose *Payment Type All*
- Press Fetch. All memberships or subscriptions by the chosen payment type which are due to expire in the month you have chosen will be returned. This can take up to a few minutes
- Once the records have been retrieved the next process is to run a validation process on the records

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

- Select all the records by clicking on the check box at the top of the left-hand side or click on the check box next to individual records to select only specific ones. The bottom section then updates to give you totals of these memberships/subscriptions by Type (e.g. Membership or Subscription), Name (e.g. Standard Membership, Student Membership) Payment Types plus monetary totals, overall and by Payment Type
- Next click on the *Validate* button

- The following are potential validation error messages, which may appear after running the validation process. If you receive any of these errors, at this stage you may want to return to the CRM to resolve the issue before running the bulk tool. Alternatively, you can run the Bulk Tool and resolve issues later, but those records will not be renewed
  - Owner is not Identifiable (Owner Id is empty). – No contact or organisation against the membership
  - Product is not renewable. - The product is not flagged for renewal
  - The Direct Debit Payment and/or Direct Debit Mandate for this membership is not active
  - There are no payment method records for this membership

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

- Product Price is not populated (this may indicate there is no price list item or price list available?)
- The Member Number is not populated
- Membership renewals that have been validated will show a *Validation Status* as

Type	Product	Business Org	Customer	Payment Type	Currency	Value	Start Date	Expiry Date	Batch No.	Validation Stat	Failure Reason
<input checked="" type="checkbox"/>	Membership: Black Horizon Mem	Silverbear	Dan Barzotti	Invoice	Pound Sterli	100.00	01/04/2019	31/03/2020		Succeeded

Selected: 6/13 Pending: 0 Succeeded: 6 Failed: 0 Status: Validation Complete

Selected Products By Type	Selected Products By Name	Selected Payment Types	Total	Total By Payment Type
Membership: 6	Black Horizon Membership: 3 Blue Sky Membership: 2 Green Level Membership: 1	Invoice: 6	Pound Sterling: 1740.00	Invoice (Pound Sterling): 1740.00

Sign into CRM Connection Details: Server: customersandboxcrm.silver-bear.info - Organisation: CustomerSandboxCRM - User Name: sb2\membership.admin

### Succeeded

- When you are happy to run the Bulk Renewal on this set of memberships and/or subscriptions, press *Renew*

### 4.4. The effects of the bulk renewal

- After the process takes place the current memberships will remain active until they expire, however new memberships with a *Status Reason* of **Pending** will be created for the members who have been renewed.
- When the current membership reaches its expiry date, its *Status Reason* will change to **Renewed**. The Pending membership will then have a *Status Reason* of Active
- If you performed a *regrade at renewal date* process at any point your customer's membership will have been renewed at the new membership type
- Depending on your configuration, some communications will be sent to the customer, e.g. a renewal notification and/or an invoice or direct debit contract/payment information

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

## 4.5. Verifying the renewal processes in CRM

- On completion of the renewal process a batch number is populated against each corresponding record. These batches allow you to store a list of all the memberships that were renewed as part of that process. You may want to access the batch to check a sample of the memberships to confirm they have renewed as you are expecting. You can access the batches by clicking on *PM Opportunity Batches* which is normally a menu option in the *Membership/Subscription Work Area*.
- Click on the batch to open it
- Once open, click on the *PM Opportunities* tab to see all the memberships which were renewed

The screenshot shows the Dynamics 365 interface for a PM Opportunity Batch. The table displays the following data:

Name	Validation Status	Created On	Member C.	Organisation	Business C.	Membership	Start Date	Supply Date	Members	Renewal C.	Product	Agreement Ty.	Avg. Instal.	Instalment	Total Value	Price List	Invoice Co.	Invoice I.

Standard Membership - Renewal 18/08/2020 1	Renewed	18/08/2020 1...	Beatrice Moses	Membership	Standard Mem	18/08/2021	17/08/2022	Member	Standard	Standard Mem Invoice	£316.80	Annually	£316.80	Price List 2021, Beatrice Moses				

- You can filter for any failures by using the filter on the *Validation Status* column
- Click on any of the membership to view them, or alternatively click on the contact or organisation to access their records and check their Membership and/or invoices/direct debit sections to see the effects of the renewal.
- You will know if a renewal was completed by the bulk renewal tool by opening one of the PM Opportunity record and check if the *Buy PM Opportunity* field is checked:

# MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

The screenshot displays the Dynamics 365 CRM interface for a record titled "Premium Membership Jan-Dec - Renewal 26/08/2020 11:55". The record is categorized as a "Membership" and is in a "Renewed" state. The "Buy PM Opportunity" field is highlighted with an orange callout box containing the text: "You should see Buy PM Opportunity ticked for bulk renewed memberships". Other fields visible include "Name", "Order/Quote No.", "Business Organisation", "Type", "Owner", "Member/Contact", "Invoice Sub-Type", "Invoice Contact", "Individual App", "Validation Status", "Refresh Date", "PM Opportunity Batch", "Priority Order", "Campaign", "Status Reason", "Monthly On-Going?", "Refresh PM Opportunity", and "Accepted Terms and Conditions".

## 4.6. Reversing Bulk Renewed Memberships/Subscriptions

Please see the Fundamentals and administration – advanced guide (when available) for information on reversing bulk renewed memberships or consult the legacy version guides.

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 5. The PM Opportunity refresher process

When you sell a renewable product a *PM Opportunity* is created using the pricing information on the price list that relates to the period it will renew in, which is why it is essential to have a Price List set for the following year as well as the current year. For more information on Price Lists and price updates please see the Advanced Module.

However, some organisations will find that they need to make changes to those following year prices at some point and if so, the PM Opportunities will need to be rebuilt in order to reflect the new pricing for that year's membership.

Because of this there is a PM refresher tool built in to most Silverbear CRM'S. This will rebuild the PM Opportunities a certain number of months before the renewal date for that membership by searching for a new price on the relevant price list and making any adjustment. This is an overnight process. For that reason, price lists will need to be updated before the number of months in advance in the plugin.

- To check how many months in advance you can go to *Silverbear Settings Work Area* and choose the *Integration Settings* option. Search for the plugin *CRM.Plugin.PMOpportunityRefresh(Months in Advance)*
- The number of months is shown in the *Config String* field. In this case 3. Therefore price lists would need to be updated at least 3 months before they come into force.

The screenshot shows the Silverbear CRM Settings interface. The breadcrumb trail is: Dynamics 365 > Membership Set - UO > Silverbear Settings > Integration Settings > CRM.Plugin.PMOpportunityRefresh (Months in Advance). The page title is "CRM.Plugin.PMOpportunityRefresh (Months in Advance)". The "General" tab is selected, showing the following configuration details:

Field	Value
Name	CRM.Plugin.PMOpportunityRefresh (Months in Advance)
Service Type	CRM.Plugin.PMOpportunityRefresh (Months in Advance)
Service URL or Config String	3
Service Description	The number of months in advance to refresh the Pm Opportunity with current data.
Integer Value 1	---
Integer Value 2	---
Integer Value 3	---
String Value 1	---
String Value 2	---
String Value 3	---
String Value 4	---
Boolean Value 1	No
Boolean Value 2	No
Boolean Value 3	No

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### Example 1

- A renewable Membership is purchased on 1st March 2020 with an expiry date of 28th February 2021.
- The organisation has a *Price List* that runs from 1<sup>st</sup> January 2020 to 31<sup>st</sup> December 2020 and the following price list runs from 1<sup>st</sup> January 2021 to 31<sup>st</sup> December 2021. At the time the member purchased the membership the price for their membership on the 2021 *Price List* was set at £250. When they purchased their membership a PM Opportunity for a membership starting 1<sup>st</sup> March 2021 at a price of £250 was created.
- However, a pricing review takes place in August 2020 and it is decided to increase the 2021 prices from £250 to £275. The 2021 Price List is updated with the new £275 price.
- Three months before the membership is due to renew (e.g. 30<sup>th</sup> November 2020), the PM Refresher Tool rebuilds the *PM Opportunity* using the new price. When this membership is renewed it will be charged at the new 2021 price.

### Example 2

- As before a renewable Membership is purchased on 1st March 2020 with an expiry date of 28th February 2021.
- The organisation has a Price List that runs from 1<sup>st</sup> January 2020 to 31<sup>st</sup> December 2020 and the following price list runs from 1<sup>st</sup> January 2021 to 31<sup>st</sup> December 2021. At the time the member purchased the membership the price for their membership on the 2021 price list was set at £250. When they purchased their membership a PM Opportunity for a membership starting 1<sup>st</sup> March 2021 at a price of £250 was created.
- However, a pricing review takes place in early December 2020 and it is decided to increase the 2021 prices from £250 to £275. On December the 15th 2020 the 2021 Price List is updated with the new £275 price.
- However, three months before the membership is due to renew (e.g. 30<sup>th</sup> November 2020), the PM Refresher tool already checked the PM Opportunity against the price on the 2021 Price List and as the price had not changed the membership will be renewed at the previous 2021 price unless some manual intervention takes place.

To avoid issues such as described in example 2, it is essential that your Price Lists are updated before the PM tool refreshes the PM opportunities for the memberships which will soon be renewing.

For example:

- your new price list starts on 1<sup>st</sup> September 2021 and your refresh months = 2, you need to update your price lists before 1<sup>st</sup> July 2021
- Your new price lists start on 1<sup>st</sup> January 2021, and your refresh months = 3, you need to update your price lists before 1<sup>st</sup> October 2021

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 6. Lapsed memberships and the Lapsing Service

Please note that this aspect of the guide can be applied to Subscriptions or Memberships; however, for ease, the term memberships is mainly used.

- Silverbear memberships can become **inactive** with a *Status Reason* of **Lapsed**. (rather than cancelled). This normally occurs with memberships that have not been renewed by the date of expiry and the membership has then been changed by the Silverbear system to lapsed
- In many cases, an organisation may want to allow a grace period. This is the period between a membership's expiry date, and it being changed to a lapsed membership; giving the member extra time to renew
- Please note that there is no standard link between the non-payment of memberships and the lapsing process. If a membership has been renewed, but not paid and you wish to change the status of that membership, manual processes, workflows or other automation would need to be in place to ensure that happened. The lapsing process changes an active membership that has not been renewed to **lapsed**. If a membership has been renewed (and therefore has been billed), the lapsing mechanism will not change the status to lapsed.

#### 6.1. Lapsing criteria

To lapse a membership (or subscription) must meet the following criteria

- The product (the membership or subscription) must be set up as lapsable. To check how your products are set up, go to the *Marketing Work Area* and choose the *Product* menu option and then click on the product. Check that the *Non-lapsable* is set to **No**; this means that the membership can lapse. If a product is setup with *Non lapsable* = **yes** it will not end at the expiry date.
- The *Expiry Date* needs to have passed and the membership must not have been renewed (either individually or with the bulk renewal tool).
- If there is a *Grace Period* defined on your Silverbear system – please see below - this period needs to have passed
- Memberships which meet the above criteria will be updated overnight by the Lapsing Tool. It will change the *Status* of those memberships to **Inactive** with a *Status Reason* of **Lapsed**.

#### 6.2. The Grace Period

Silverbear's lapsing service has a configurable Grace Period. The default length is 3 months, but it could be a much shorter period, even just a matter of days as this period can be customised depending on your business process. Please check with your Systems Administrator or Silverbear if you need to check or adjust the grace period for the lapsing process.

## MEMBERSHIPS, SUBSCRIPTIONS AND PRODUCTS – INTERMEDIATE MODULE

### 6.3. Renewing a lapsed membership

Sometimes a client whose membership has lapsed might want to renew or re-join. The two options are to sell the member a brand-new membership – through the Cart in the normal way - or to renew the older lapsed membership.

If you choose to reactivate the closed PM Opportunity on the lapsed membership and then process the renewal through the cart then the implications of this are that if the original expiry date was some months ago, renewing it might only give a very short membership period.

- Open your contact record, go to the *Memberships* tab (or *Related* and then *Memberships*) to find the lapsed membership, and click to open it. You might need to change the view to include Inactive Memberships as well as the Active ones
- Once you have opened the membership, scroll down to the Renewal Information section and click on the PM Opportunity (the blue hyperlink). This PM Opportunity will be inactive with a Status Reason of Closed - Cancelled
- Click the *Activate* button on the command bar to reopen this record, note that you are reactivating the PM Opportunity (the renewal record) not the original membership

The screenshot shows the Dynamics 365 interface for a membership record. The record is titled "Premium Membership Jan-Dec - Renewal 25/08/2020 11:55". The status is "Inactive". The "Status Reason" is "Closed - Cancelled". The "PM Opportunity" is also "Inactive". An orange callout box with the text "Click Activate" points to the "Activate" button in the command bar. The interface includes a left-hand navigation pane with various tabs like "Home", "Recent", "Pinned", "My Work", "Dashboards", "Activities", "Customers", "Accounts", "Members / Contacts", "Leads", "Purchases", "Membership", "Subscriptions", "Purchased Products", "Finance", "Invoices", "Payment Methods", "Renewals", "PM Opportunities", "PM Opportunity Batch", and "Business Processes". The main area displays details for the membership, including "Order/Quote No.", "Type", "Sub Type", "Organisation", "Price List", "Invoice Organisation", "Related Invoice", "Individual App Stage", "is Refreshed", "PM Opportunity Batch", "Priority Order", "Campaign", "Status Reason", and "Purchase Order No."

- Click *Related* and then *Cart* to go into the Cart and process the renewal as normal
- The membership will default to starting when the previous one ended, and the previous membership will be shown as **renewed**
